Information from the **Healers in Business** website –

\*\* Healers In Business (HIB) is a new and innovative network devoted to ethical business growth and success for complementary or alternative health practitioners, product suppliers, and support services. The founders are Angel LaLiberte and Bill Cozzens.

The first centre for the HIB Network is launching in Vancouver, BC, Canada, with a special, landmark event on 4th June 2005. From this time on, there will be “**Find A Healer**” and “**Consumer Ombudsman**” options on the website. These are free resources to assist and protect the public.

The HIB Network facilitates business growth and credibility for its members through ethical practices, a referral network, skills exchanges, members' benefits, and specialized workshops on effective marketing and business skills.

The HIB Network, for the first time, unites practitioners and product/service providers from all complementary/alternative modalities and skills sets under a common umbrella, towards a single goal—ethical success. \*\*
